Side Project

Portfolio

- Developed a portfolio website using React, showcasing personal projects and experience.
- Utilized responsive design techniques to ensure optimal display on various screen sizes.
- Implemented features such as a contact form using email JS, resume download.
- Incorporated CSS animations to enhance user experience and add visual interest.
- Utilized Git for version control.
- Hosted the website on Github pages using CI/CD automated deployments

React

Myjournal

- Developed Journal Application using Data Structures in Python.
- Used linked-list to store the journal where each page is a node in the list.
- New journals can be stored and read using Object Serialization.
- Users can save new pages wherever they want, not just at the beginning or end.
- If the user enters an incorrect input, an error message is displayed to help the user enter the correct input.

Python

QuizApp

- Implemented a user-friendly interface for taking quizzes.
- At the end of the quiz, it shows how many correct answers the user got right.

HTML, JavaScript, CSS

ToDoListApp

- Basic todo list application to track task of the day between work and personal.
- Implemented functionality such as task creation, task editing, and task deleting as complete.
- Utilized local storage to persist data and maintain the state of the app between sessions.

HTML, JavaScript, CSS

RecipeApp

- Created an online recipe app that allows the user to search for a desired dish and access its corresponding recipe.
- Users can bookmark their favorite recipes so that they can be viewed again at any time.

HTML, JavaScript, CSS
